DPE: the new Multi-Head Digital Printer for Corrugated Board!

Our new inline digital printer, designed specifically for corrugated board applications, represents a significant step forward in industrial printing technology. It is equipped with Fujifilm printheads, with up to 8 heads available, managed by dedicated control units organized in groups of 4. This configuration ensures high precision, operational flexibility, and consistent print quality, even for high-volume production runs.

With this solution, customers can rely on a reliable and scalable system, ideal for meeting personalization needs and just-in-time printing requirements quickly and efficiently.
